

WELCOME SPEECH

by Head of Scientific Committee

Distinguished guests, keynote speakers, respected researchers, and all participants

Good morning, and welcome to the Frontier in Sustainable Agromaritime and Environmental Development Conference, FiSAED 2026.

On behalf of the Scientific Committee, it is my great pleasure to welcome all of you to this international scientific forum. We are honored by your participation and deeply appreciate the contributions of our speakers, authors, reviewers, and participants in advancing meaningful scientific exchange.

The theme of FiSAED 2026, "From Innovation to Impact: Accelerating Science-Based Solutions for Sustainable Agromaritime Futures," emphasizes an important responsibility of the scientific community. Scientific excellence should not only be reflected in novelty, methodological rigor, and publication quality, but also in the relevance of research to real-world challenges and its capacity to contribute to evidence-based solutions for society and the environment.

This year's conference brings together research across four interconnected areas: Sustainable Natural Resources and Environmental Management, Science and Technology for Sustainable Agromaritime, Environmental Health and Ecosystems, and Socio-economic Transformation for Sustainable Agromaritime. These diverse perspectives reflect the complexity of current sustainability challenges and demonstrate why interdisciplinary approaches are increasingly essential for generating comprehensive and applicable solutions.

WELCOME SPEECH

by Head of Scientific Committee

As the Scientific Committee, we place strong emphasis on the quality, originality, and scientific relevance of the contributions presented at FiSAED 2026. We sincerely acknowledge the efforts of all authors who have shared their research and of the reviewers who have supported the scientific evaluation process. We hope that the presentations and discussions throughout this conference will encourage critical reflection, constructive feedback, and the refinement of ideas that can contribute to further scientific advancement.

FiSAED is also intended to serve as a platform where scientific evidence can move beyond academic discussion. We encourage participants to explore opportunities for interdisciplinary research, joint publications, research networks, and collaborations that connect scientific findings with policy, technology, industry, communities, and environmental management. In this way, research can progress from generating knowledge toward creating measurable and lasting impact.

Finally, I would like to express my sincere appreciation to the organizing committee, scientific reviewers, keynote and invited speakers, authors, partner institutions, and all participants who have contributed to FiSAED 2026. I hope this conference will foster rigorous scientific dialogue, strengthen international collaboration, and inspire high-quality research that responds to the challenges of sustainable agromaritime and environmental development. I wish you all engaging discussions, inspiring exchanges, and a successful conference ahead.

Once again welcome to FiSAED 2026.
Thank you very much.
