

# WELCOME SPEECH

**Prof. Dr. Anuraga Jayanegara, S.Pt., M.Sc.**  
Head of Scientific Committee

Ladies and gentlemen,  
Distinguished guests, scholars, researchers, and participants  
from various corners of the world,

We extend our gratitude to the Almighty for the continuous flow of blessings, guidance, and grace in our lives. I am truly honored to host all of you at the "2023 Frontier in Sustainable Agromaritime and Environmental Development International Online Conference." It is a great pleasure as the Head of the Scientific Committee of the FiSAED to extend a warm welcome to all of you. FiSAED is an abbreviation for Frontier in Sustainable Agromaritime and Environmental Development, an event aimed at becoming a superior platform for introducing, discussing, and developing innovations in the fields of sustainable agriculture and environmental development. This event, which is held for the first time this year, is expected to become a regular agenda that will enrich our knowledge and skills in achieving sustainable agriculture and better environmental development.

The 2023 FiSAED conference carries the theme "Contribution of Frontier Agromaritime toward Sustainable Development Goals." This theme was chosen in earnest because it responds to global challenges related to agriculture and the environment and as a reflection of our determination to seek innovative solutions that can lead to sustainability in this field. Innovation not only refers to the use of the latest technology but also includes new approaches in natural resource management and environmental development.

From this big theme, four sub-themes were taken, which represent a unity consisting of: "Science and technology for sustainable agromaritime," "Socio-economic transformation for sustainable agromaritime," "Sustainable natural resources and environmental management," and "One health ecosystems and society ." These four sub-themes were designed to provide in-depth and comprehensive insights into key aspects of sustainable agriculture and the environment.

In this conference, we will not only be presented with the works and innovations of writers but also with many professional speakers from five continents in the world. They share their experiences, knowledge, and insights, providing diverse viewpoints to enrich their understanding.

Many benefits can be gained from attending this event, from expanding professional networks to gaining the latest insights into agricultural and environmental trends. Therefore, I invited all participants and audiences to follow and disseminate information about the event. With all of our support, I am sure that FiSAED will become an increasingly prestigious and useful platform, not only for experts and practitioners in this field, but also for the wider community. Thank you for your consideration and support. We will now create a more sustainable agricultural and environmental future.

Thank you.
