

THEME

**“Harnessing Innovation and Technology in Fostering the
Advancement of Tropical Bioresources”**

The Objective

The objectives of the 1st ISOTOBAT 2024 as follow:

1. Promote innovation in tropical bioresource management for sustainable environmental practices.
2. Facilitate interdisciplinary dialogue and collaboration across key sectors: agriculture, forestry, marine biology, and animal sciences.
3. Highlight the role of socio-economic and business transformations in environmental sustainability.
4. Showcase advancements in bioresource science and engineering technologies.
5. Discuss the impact of bioresources on natural food and nutrition for improving public health.

The Participants

1. Professional
2. Academics and Researchers
3. Policy Makers

The Advantages

1. Peer-reviewed publications in the Scopus-indexed BIO Web of Conferences.
2. Strengthened interdisciplinary collaborations among international researchers and practitioners.
3. Increased awareness and adoption of innovative practices and technologies for the sustainable management of tropical bioresources.
4. Enhanced policy and community engagement towards sustainability and health.

THEME

**“Harnessing Innovation and Technology in Fostering the
Advancement of Tropical Bioresources”**

Agriculture, Animal Sciences, Agroforestry, and Agro Maritim towards a sustainable environment

- Animal and Veterinary
- Agriculture
- Marine biotechnology and agromaritime
- Forestry

Socio-economics and Business Transformation in Tropical Bioresources

- Socio economics
- Business

Innovative Technologies in Bioresource Science and Engineering

- Environment
- Basic science
- Engineering

Bioresources in Food and Nutrition for a Healthier Future

- Food Nutrition
- Health
