

OPENING SPEECH

by Chairman Committee

Good morning,
Distinguished keynote speakers, invited speakers, respected participants, ladies and gentlemen,

On behalf of the organizing committee, it is my great pleasure to warmly welcome you to The 3rd International Seminar on Tropical Bioresources Advancement and Technology (ISOTOBAT 2026).

We are honored to have you with us in this international forum, organized by the Directorate of Strategic Studies and Academic Reputation, IPB University, in collaboration with the Asosiasi Reproduksi Hewan Indonesia (ARHI). This year, ISOTOBAT 2026 carries the theme, "Tropical Bioresources for One Health: Integrating Biotechnology, Digital Tools, and Sustainability," a theme that strongly reflects the urgency of strengthening collaboration across science, innovation, and sustainable development.

This seminar is designed as a multidisciplinary platform that brings together researchers, academics, practitioners, industry, and policymakers to exchange knowledge, share research findings, and foster meaningful collaboration. Through the four sub-themes of this seminar, we hope to encourage productive discussions and generate insights that contribute to the advancement of tropical bioresources for a healthier and more sustainable future.

On this occasion, I would like to express my sincere appreciation to all keynote speakers, invited speakers, presenters, reviewers, partners, and participants for your valuable contribution and support. I also extend my heartfelt gratitude to all members of the organizing committee for their hard work and dedication in preparing this seminar.

We sincerely hope that ISOTOBAT 2026 will serve as a fruitful platform for academic exchange, networking, and future collaboration.

Thank you for your participation, and I wish you all a productive and inspiring seminar.
