

THEME

“Tropical Bioresources for One Health: Integrating Biotechnology, Digital Tools, and Sustainability”

The Objective

The objective of ISOTOBAT 2026 is to provide an international forum for researchers, academics, practitioners, industry representatives, and policymakers to exchange knowledge, share recent advances, and discuss innovative solutions for the sustainable utilization of tropical bioresources. The seminar aims to strengthen interdisciplinary collaboration, promote the integration of biotechnology, digital tools, and sustainability, and support the One Health agenda toward healthier and more resilient tropical bioresource systems. Through this platform, ISOTOBAT 2026 is also expected to foster strategic partnerships and encourage science-based actions that contribute to the development of healthier, more adaptive, and sustainable tropical bioresource systems.

The Participants

- Professionals
- Academics
- Researchers
- Policymakers

The Advantages

- Knowledge Exchange
- Networking
- Exposure to Innovation
- Policy Insight
- Professional Development

THEME

“Tropical Bioresources for One Health: Integrating Biotechnology, Digital Tools, and Sustainability”

Agriculture, Animal Sciences, Agroforestry, and Agro- Maritime Towards a Sustainable Environment

- Animal and Veterinary
- Agriculture
- Marine biotechnology and Agromaritime
- Forestry

Socio-economics and Business Transformation in Tropical Bioresources

- Socio economics
- Business

Innovative Technology in Bioresource Science and Engineering

- Environment
- Basic science
- Engineering

Bioresources in Food and Nutrition for a Healthier Future

- Food Nutrition
- Health
