MODERATOR PROCEDURE

The seminar will be held online via Zoom and will take place over two days, on May 21–22, 2026. Four Zoom rooms will be provided and organized according to the respective sub-themes. On both the first and second days, the program will be divided into three sessions. In each Zoom room, there will be three committee operators, one moderator, six to nine presenters, and non-presenter participants. The moderator will be responsible for leading the session and facilitating the discussion between presenters and participants. Presentations will not be delivered live, but through video playback operated by the committee, using presentation videos prepared in advance by each presenter. Each presenter will be allocated a maximum of 10 minutes, consisting of 5–7 minutes for the video presentation and 3–5 minutes for the question-and-answer session. The moderator's duties will include the following:

1. Enter the zoom link 15 minutes before the specified schedule
2. The moderator opens and guides the course of the event
3. Gives instructions to the operator to start and stop the video presentation
4. Lead the way for questions and answers
5. Closing the event and ending the session

Due to the large number of published articles and limited duration, we hope that the moderator can strictly implement the specified time distribution
